
Cognitive Radio Interoperability Through Waveform Reconfiguration

cognitive radio and ai-enabled networks symposium - • ai-enabled resource allocation in cognitive radio and networks • energy-efficient cognitive radio communications and networking • self-configuration, interoperability and co-existence issues • machine learning techniques for cognitive radio and networks • deep learning techniques for cognitive radio and networks **ontology-based reconfigurability of cognitive radio** - ontology-based reconfigurability of cognitive radio a dissertation presented by leszek janusz lechowicz to the department of electrical and computer engineering in partial fulfillment of the requirements for the degree of doctor of philosophy in the field of computer engineering northeastern university boston, massachusetts november, 2012 **introduction to software defined radio, cognitive radio ...** - and internal state and can make decisions about their radio operating behavior based on that information and predefined objectives. ... - b.) cognitive radio (as defined in a.) that utilizes software defined radio, adaptive radio, and other technologies to automatically adjust its behavior or operations to achieve desired objectives. **cognitive radio definitions and nomenclature - sdrforum** - cognitive radio definitions and nomenclature sdrf-06-p-0009-v1.0.0 1 executive summary "cognitive radio" is a term that has caught the attention of a wide range of stakeholders in the wireless industry. unfortunately it has been applied in an inconsistent manner, often as the ideal solution for the problems of that specific sector. **configurable sdr operation for cognitive radio ...** - with interoperability issues plaguing emergency responders throughout the country, cognitive radio (cr) offers a unique solution to streamline communication between police, emergency medical technicians (emt), and military officers. using software defined radio (sdr) technology, a flexible radio platform can be potentially configured **cognitive radio cloud networks: assured access in the ...** - cognitive radio cloud networks (crcns) will assure the department of defense (dod) is capable of gaining and maintaining spectrum access and network connectivity in order to gain a decisive warfighting advantage in the information age. the future of network-enabled warfare **cognitive radio tech assessment - wireless innovation forum** - research in cognitive radio technologies that can be leveraged to benefit public safety. software defined radio and cognitive radio technologies have potential to provide important capabilities for public safety communications networks, including enhanced interoperability, **cognitive radio cloud networks: assured access in the future** - cognitive radio cloud networks (crcn) will assure that the dod is capable of gaining and maintaining spectrum access and network connectivity to gain a decisive war-fighting advantage in the information age. the future of network-enabled warfare will rely heavily on the ever-increasing digital exchange of information transported through the elec- **an overview of cognitive radio research at virginia tech** - cognitive radio, which can be implemented on the top of sdr, ... interoperability can be possible through one of the benefits obtainable from the reconfigurability of sdr. a cognitive radio can be designed to operate in cooperative or non-cooperative situations among surrounding radios. **cognitive gateway design to promote universal interoperability** - cognitive gateways (cg) are conceived as a kind of special cognitive radio (cr) node that interconnects different systems. this paper presents a cg design which will facilitate universal interoperability between incompatible waveforms used by a variety of heterogeneous communication systems. in specific scenarios, a cg can act **emotion controlled spectrum mobility scheme for efficient ...** - human beings. however, this role of emotions has not been explored in the field of cognitive radio in general and in the spectrum handover for efficient syntactic interoperability in vehicular networks in specific. in our previous research work, we proposed the outlines of cognitive radio site (cr-site) that acts as in- **cognitive radio network architecture: part i - general ...** - cognitive radio technology could also facilitate interoperability among different communication systems in which frequency bands and/or transmission formats differ [1]. 2. terminal capability of cognitive radio networks the capabilities of cognitive radios as nodes of crn can be classified according to their functionalities. a cognitive radio **call for papers for cognitive radio and networks symposium** - energy-efficient cognitive radio communications and networking self-configuration, interoperability and co-existence issues distributed adaptation and optimization methods machine learning techniques for cognitive radio systems architecture and implementation of database-based cognitive radio networks **overview - stanford university** - cognitive radio fcc definition: "a radio or system that senses its operational electromagnetic environment and can dynamically and autonomously adjust its radio operating parameters to modify system operation, such as maximize throughput, mitigate interference, facilitate interoperability, access secondary markets." **cognitive radio application for smart grid - ijsgce** - international journal of smart grid and clean energy cognitive radio application for smart grid vasudev dehalwara, mohan kolheb,*, sunita kolheb a department of computer science and engineering, ma national institute of technology, bhopal, india b faculty of engineering and science, university of agder, grimstad 4879, norway abstract the communication infrastructure between energy generation ...
